Amman-Jordan

Technical Skills

- MS-SQL
- Node.JS
- Express.js
- c#
- MongoDB
- Java Script
- HTML, CSS
- NLP
- Deep Learning
- Php
- MySQL Workbench
- ASP.NET MVC
- .NET Core
- Postman
- OOP
- Unit Testing
- Python
- Oracle
- SSMS
- Laravel

Soft Skills

- Flexibility
- Teamwork
- Self Learning
- Time Management

Certifications

- ARTIFICIAL INTELLIGENCE FUNDAMENTALS | 2024
IBM
 - Certificate link
- HTML, CSS, AND JS FOR WEB DEVELOPERS | 2024
Coursera
 - Certificate link

Projects

- WEATHER APP
MongoDB, NodeJS, React, MVC, ExpressJS, Postman
 - Designed and deployed a full-stack weather application that consumes third-party APIs to display real-time climate data. Implemented RESTful API integration, asynchronous data handling, and persistent storage with MongoDB.
- OPENSOOQ SIMULATION
HTML, CSS, JS, Bootstrap.ASP.NET core MVC, MySQL, C#
 - Developed a dynamic classifieds platform modeled after OpenSooq, featuring user account management, ad listing, search filtering, and administrative controls. Leveraged MVC architecture for maintainability and scalability.
- NEXTGEN ELEARNING SYSTEM
Node.js, ExpressJS, MongoDB, WebSocket, JWT, Mocha/Chai, Joi, Gemini API, React
 - Designed and deployed a full-stack e-learning system with secure JWT authentication, multilingual interface (English/Arabic), and real-time messaging using WebSocket.
 - Built RESTful APIs, integrated an AI chatbot in the dashboard via Gemini API, and implemented frontend with React for a responsive user experience.
 - Tested backend components with Mocha/Chai. Seeded the database with initial data for development and testing.

Professional Summary

Forward-looking Full-Stack Developer with a bachelor's degree in Computer Information Systems and a master's degree in Artificial Intelligence. Expertise in Node.js, ASP.NET MVC, Python, and database systems (MS-SQL, Oracle, MongoDB). Strong background in AI research including NLP, deep learning, and autonomous systems. Proven ability to deliver end-to-end web solutions and innovative technical projects.

Work Experience

- FULL STACK DEVELOPER | June 2025 - Present
HR Global For Business Development
 - Developing and maintaining a ERP system covering procurement, warehouse, sales, and finance operations.
 - Implementing purchase order flows, supplier management, purchase invoices, and approval processes.
 - Fixing system bugs, improving performance, and maintaining correct business rules across all ERP modules.
 - Building PDF rental invoices, improving payment flow, and adding system actions.
 - Developing real-time notifications for all roles (admin, finance manager, warehouse manager, sales rep, drivers) with workflow-based triggers.
 - Developing the OKAuto car rental website and app including reservation workflow, vehicle availability, extra services, coupon discounts, tax calculations, and vendor income logic.
 - Fixing bugs and improving overall rental workflow and user experience for both admin and vendors.
 - Maintaining and updating multiple informative and business websites with responsive design, multilingual support, and clean layouts.
 - Handling frontend and backend development using PHP, Laravel, MySQL, HTML, CSS, JavaScript, and Bootstrap.
 - Improving UI components such as tables, forms, modals, filters, and dashboards to enhance usability.
 - Optimizing MySQL queries, adding/improving tables and triggers, and ensuring accurate data flow between modules.
- BACKEND DEVELOPER | December 2024 - June 2025
IDEAL INNOVATION HOUSE (IIH.AI)
 - Participated in the "Digital Skills Development and Employment" program under the "Youth, Technology, and Jobs" initiative. Supervised by Digiskills and trained at IIH.
 - Built responsive scalable server-side applications using Node.js and Express.js, enhancing performance and maintainability.
 - Architecting and documenting RESTful APIs for seamless integration across systems.
 - Designing efficient MongoDB schemas and optimizing queries for high-volume data operations.
 - Building and deploying a real-time WeatherApp with dynamic data processing pipelines.
 - Handling complex image processing tasks and implementing robust data security measures to safeguard sensitive information.
- FULL STACK DEVELOPER | September 2022 - November 2022
NEXTWO
 - Delivered full-stack web solutions using ASP.NET MVC and Entity Framework, streamlining data operations.
 - Built responsive front-ends with HTML5, CSS3, and JavaScript to improve user accessibility and interface responsiveness.
 - Administered Microsoft SQL Server to manage CRUD operations and ensure data consistency.
 - Contributed to a simulated e-commerce platform (OpenSooq), reinforcing agile development workflows.
 - Deployed solutions via IIS and Visual Studio, ensuring smooth production transitions.
- FULL STACK DEVELOPER | January 2022 - April 2022
TAHLUF AI EMARAT TECHNICAL SOLUTIONS
 - Developed interactive web applications using ASP.NET MVC, HTML, CSS, and JavaScript.
 - Leveraged Entity Framework for efficient database access and data manipulation.
 - Maintained backend systems with .NET Core and managed Oracle Server databases for large-scale applications.

Education

- MASTER OF ARTIFICIAL INTELLIGENCE** | **2022 - 2025**

YARMOUK UNIVERSITY

- Conducted NLP research on Arabic Named Entity Recognition using BERT-based models, improving entity extraction accuracy.
 - Developed a deep learning model for heart disease prediction, leveraging patient data for medical risk analysis.
 - Designed and verified a CTL-based model for autonomous traffic junction management, enhancing safety protocols in self-driving systems.
 - Built expert systems for dermatological diagnosis, integrating medical knowledge bases and AI-driven decision support.
 - Created a chatbot that performs PDF document analysis and abstractive summarization using ML/NLP pipelines.
- BACHELOR OF COMPUTER INFORMATION SYSTEM** | **2018 - 2022**

YARMOUK UNIVERSITY

- Designed and queried relational databases using SQL, applying principles of normalization, indexing, and query optimization.
 - Studied information security fundamentals, including encryption algorithms, authentication protocols, and access control models.
 - Built and deployed dynamic web applications using HTML, CSS, and JavaScript, applying responsive design principles.
 - Gained practical experience with data structures, object-oriented programming, and system analysis.
